When Heat Demon converted the ATV heated grips to the current clamp-on style, the mounting hardware was also updated. A metal L-bracket is now used to mount to the ATV using an existing 6mm bolt. A longer bolt and spacer is included in the kit to be used if necessary.

Heat Demon - Symtec

When using the Big Buddy Heater with the 20-pound tank, the regulator and control valve can get clogged by residue formed due to the high PSI from the propane tank. This can be avoided by turning off the tank first and allowing the fuel left in the hose to burn up completely, rather than just switching off the heater.

What Are Some Common Problems With Mr. Buddy Heaters?
