Symbolic algebra was developed in the 1500s. Symbolic algebra has symbols for the arithmetic operations of addition, subtraction, multiplication, division, powers, and roots as well as symbols for grouping expressions (such as parentheses), and most importantly, used letters for variables. Once symbolic algebra was developed in the 1500s, mathematics

Introduction to Modern Algebra - Department of Mathematics ...

The discovery of rings having noncommutative multiplication was an important stimulus in the development of modern algebra. For example, the set of n -by- n matrices is a noncommutative ring, but since there are nonzero matrices without inverses, it is not a division ring. The first example of a noncommutative division ring was the quaternions.
