What is risk process? Safety loading.  
Some classical results in ruin theory Risk process is a stochastic process for modeling the wealth of an insurance company. Definition 3. Risk process is a stochastic process defined by  $X(t) = ct - \sum_{k=1}^N Z_k$  where  $c > 0$  - a constant called gross premium rate (the company receives c units of money per unit time),

stochastic orders are closely related, so that the answer to a non-contingent risk comparison problem always provides the answer to the corresponding contingent risk ...

## **New methods in the classical economics of uncertainty ...**

The main aim of this paper is to introduce the notion of risk excess measure, to analyze its properties, and to describe some basic construction methods. To compare the risk excess of one distribution  $Q$  w.r.t. a given risk distribution  $P$ , we apply the concept of hemi-metrics on the space of probability measures. This view of risk comparison has a natural basis in the extension of orderings ...
