The X100V has the same sensor as the X-T3 and X-Pro3, which is the fourth generation X-Trans chip with a BSI structure (back-illuminated) and 26.1 megapixels. Just as the sensors are different, we also find a difference in the image processor: the X100F uses the X-Processor Pro engine whereas the new X100V has the faster X-Processor 4.

Fujifilm X100F vs X100V - The 10 Main Differences

Curiously Fujifilm decided to get rid of the 4-way directional pad that is found on the X100F and all other interchangeable X series cameras. This means that the fixed lens camera has more physical function buttons but you can recover the 4-way pad on the X-E3 with special touch screen functionalities (more on this below).

The 10 Main Differences Between the Fujifilm X-E3 and X100F
