The Nature Of Cities The

The urban matrix is dominated by the built environment that undoubtedly predominates over green infrastructures like domestic gardens, woodlands, tree-lined streets, squares, sports fields, and green corridors. Thus, cities must be seen as a complex system where the interacting gray, green, and blue elements cannot be analyzed individually.

It's absolutely essential to daily life. We can find it in the cities where we live, it's all around us if we look, but there are also many innovative ways in which nature can be designed into urban environments. This is the story of both the nature in our own backyards as well as that being built into to cities of the future.

Conversations - The Nature of Cities

The Nature of Cities is curating a series of poems and fiction from around the world on themes of cities: communities, infrastructure, open space, and nature. It is a series about the cities of our dreams: resilient, sustainable, livable, and just. One example of this approach can be seen in Stories of the Nature of Cities, our short fiction contest series. Stories from that project, plus other fiction, poetry, and imaginative essays will appear here.

The Nature of Cities. The Nature of Cities. By CHAUNCY D. HARRIS and EDWARD L. ULLMAN. CITIES are the focal points in the occupation and utilization of the earth by man. Both a product of and an influence on surrounding regions, they develop in definite patterns in response to economic and social needs.

The Nature of Cities - JSTOR

Bringing nature into cities is hardly a new idea. In fact, it has swung in and out of vogue for more than a century, ever since Victorian social reformer Ebenezer Howard published what became the Garden Cities of To-morrow manifesto in 1898. Prompted by the squalid, polluted and dangerous environment faced by Victorian city dwellers and their growing alienation from the natural world, Howard's idea was simple: to create places that brought together the best of urban and rural — homes ...
