The Psychology of Science: A Reconnaissance. A fascinating glimpse of what science and medicine might be like if we could work to "re-humanize" them. Maslow contrasts humanistic science with value-free, orthodox science, and offers a new knowledge paradigm to replace classical "scientific objectivity".

function and behavior, and the environment and behavior, applying what they learn to illuminate our understanding and improve the world around us.

Science of Psychology - American Psychological Association

Science assumes that there are laws of

Acces PDF The Psychology Of Science A Reconnaissance

human behavior that apply to each person. Therefore science takes both a deterministic and reductionist approach. Science studies overt behavior because overt behavior is objectively observable and can be measured, allowing different psychologists to record behavior and agree on what has been observed.
